Etiketten Labels

Our editorial staff is preparing the following focus topics:

Prepress / Printing forme production

→ Prepress and workflow management: Current production software

We present current software solutions for the optimal design of labels and the corresponding workflow from prepress to printing plate production. New modules have been added to the Esko Suite and GWG also offers specifications for label production.

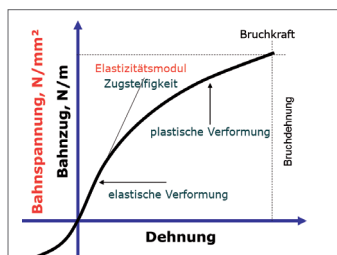

→ Printing plate technologies for flexo printing

New printing plates, especially for flexo printing, but also plate-making technologies are being presented again and again in order to reduce production times and thus also the manufacturing costs. We present the latest solutions.

Printing machines (conventional, hybrid, digital)

Web tension

A large number of different systems are required for the optimal flow of a material web in the printing press. This also includes the control and regulation of web tension. We deal with the technology in detail and explain the most important technological basics.

Substrates

(paper, films, thermal material, metallized materials, etc.)

Adhesives materials and adhesives:

New solutions for special requirements

Ecology & Sustainability: Energy optimization, energy efficiency

→ Sustainability in corporate training

Small and medium-sized businesses as well as large companies are required to do everything to protect the environment and act sustainably. Our author deals with in-company training, especially from the point of view of sustainability.

Special Finishing & Veredelung (n° 1/2022)

In our special we focus on the latest developments in conventional and hybrid converting and finishing of analog and digitally printed labels.

→ Label finishing

Today, modern finishing and converting systems enable a large number of different options at high production speeds in order to be able to optimally present labels and flexible packaging. We present a few variants.

→ Embossing (cold / hot / hologram foil)

→ Varnishing

→ Laminating

→ Conventional and laser die-cutting

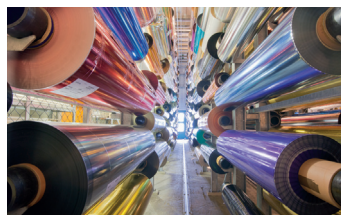

→ Survey Finishing & Refinement

In our current survey, we asked numerous suppliers of finishing and converting systems and materials for a statement on the current market situation, a glimpse into the future and the presentation of the latest machines and systems to meet the needs of label companies.

→ Finishing user tour

We visited four label printers that produce with systems from B&T Tec. The focus was on the use of the corresponding inspection and finishing systems. We also present the companies and their focus.
